

What's possible when the best minds in HF alkylation come together?

September 21–24, 2026

Houston Marriott Sugar Land | Texas

Join us at the **Becht HF Alkylation Summit 2026**:

2.5 days of candid conversations with the technical and operations leaders responsible for keeping alkylation units safe, reliable, efficient, and compliant.

Expect audience-driven Q&A and practical takeaways you can put to work as soon as you're back on site. Don't miss this exclusive chance to collaborate with industry experts and peers who understand your toughest challenges and are ready to share what's working in the field. If you want a clearer view of where HF alkylation is heading and how others are handling shifting standards and greater demands, **you'll find it here.**

Topics we'll cover include:

- Key updates in API RP 751 Rev. 6
- IOWs in practice
- Smarter RADS automation decisions
- Scaling corrosion & vibration monitoring
- Evolving strategies in dead leg management
- Beyond 100% component inspection
- C5 alkylation economics & tradeoffs
- Alternatives to HF & where they stand
- Live Q&A with SMEs
