
ARPEL Leadership Program

Cycles 2018 and 2019

Evaluation Report

Program background and overview

Objective

To give a high-level overview of the energy business, preparing future leaders by providing a global perspective of the business in the region.

Differential added value

- Addressing issues that are not usually included in training programs for companies, in university training programs or in courses given by the industry in the market.
- Networking among business leaders in the region.

Target audience

Professionals of oil and gas sector companies in Latin America who report to the president or vice president as well as those with high potential to hold senior positions in their organizations (directors and vice presidents).

Professionals

Staff of high level instructors of IHS Markit.

Testimony of participants:

“It was very interesting module providing broad vision of industry, bringing relevant information to build the required knowledge to support important business decisions in the near future”

“The program includes updated statistics on all issues and shows the managerial initiative and the way to act very clearly. The professionals are highly trained and very communicative.”

“Very good discussions, very productive and instructive. I found the chapter entitled "How companies have changed and why" excellent.”

“Excellent program! Well structured and well developed. High level of instructors and participants. Very relevant content, congratulations!”

“A balanced course that makes us reflect and look to the future at the speed of light in order not to be left behind.”

“Very good integration.”

“Excellent organization”

“Very good combination between theoretical sessions and practical exercises.”

“Everything was excellent. Please continue with this kind of programs that provide know how to the rest of the team and make work more efficient in a profitable and safe manner.”
